Mohamed Habib

Full Stack Developer

👤 Profile

Skilled Backend Developer with over 6 years of experience in designing and optimizing high-performance backend systems and scalable APIs. Proficient in Python, PHP Laravel, and Node.js, with expertise in RESTful APIs, microservices architecture, and database optimization. Adept at deploying CI/CD pipelines and utilizing tools like Docker, Elasticsearch, and AWS to deliver robust solutions for high-traffic environments. Passionate about creating efficient, user-centric systems that drive business success.

💼 Employment History

Full Stack Developer | Code700 | Riyadh
(Feb 24 — Aug 24)

Led development of a **multi-tenant charity web application** using the **MERN stack** with a team of 5 developers.

Designed and implemented **API integrations** for payment systems, increasing processing speed.

Developed **responsive front-end** using **ReactJS** and optimized backend with **Node.js**.

Team Leader Backend | Enjoy Driving | Remote
(May 23 — Feb 24)

Led backend development of a **ride-hailing app** similar to Uber, using **PHP Laravel** and **Node.js,** handling 1,000+ daily active users.

Built **real-time tracking and chat functionalities** with **WebSocket,** reduce latency by 20%.

Full Stack Developer | Al-Tawasol | New Cairo
(Jan 21 — May 23)

Developed **ERP**, **CRM**, and **GIS** systems using **ASP.NET Core (5, 6, 7)** for **Mapy GIS** (similar to Google Maps).

Led development efforts on a **Kotlin-based** backend using **Ktor** for high-performance systems.

Implemented search features in **Elasticsearch** for faster data retrieval.

Contributed to the development of the **ERP system** by integrating various services and optimizing workflows.

Worked with **PHP (Laravel)** and **Python** for multiple backend services.

Full Stack Developer | Rwabett | Nasr City
(Jun 19 — Dec 20)

Built and maintained **e-commerce systems** and **ERP systems** using **PHP Laravel**, **Node.js (NestJS & AdonisJS)**, and **Python (Flask)**.

Developed **front-end applications** with **ReactJS** and **VueJS**.

Created and optimized **APIs** for seamless integration with mobile applications.

Worked on server-side functionality and improved system performance by 30%.

PHP Laravel | GLOBAL DEV GATE | 6 October City
(Jun 18 — Jun 19)

Developed **online educational systems** with a focus on **real-time communication** via **Socket.IO** for chat functionality.

Worked on **backend services** using **PHP Laravel** and **Node.js**.

Integrated **ReactJS** and **VueJS** for the front-end, ensuring a responsive and user-friendly interface.

Worked on **real-time chat** functionalities, improving communication speed and system reliability.

Skills

Programming Languages: Python, PHP (Laravel, Symfony), Node.js (NestJS, AdonisJS), Kotlin
Backend Development Tools: Docker, AWS, WebSocket, GraphQL, Elasticsearch
Frontend Frameworks: ReactJS, VueJS
Version Control & CI/CD: Git, GitHub, Jenkins
Database: MySQL, MongoDB, Postgres, etc.

Soft Skills

Leadership & Team Management: Proven experience leading development teams, setting goals, and ensuring successful project outcomes.
Collaboration: Exceptional ability to work with cross-functional teams, bridging the gap between front-end, back-end, and product management.
Communication: Able to articulate complex technical concepts to both technical and non-technical stakeholders.
Problem Solving: Quick at identifying and resolving issues, ensuring minimal disruptions to the development process.
Time Management & Prioritization: Skilled at managing multiple tasks and projects simultaneously, ensuring deadlines are met.
Adaptability: Flexible in adapting to new technologies, tools, and working conditions, whether in fast-paced startups or structured environments.
Customer-Centric: Focused on creating solutions that meet user needs, ensuring a smooth and intuitive experience.
